

School Program Guide | 2024-2025

Inspire your students in our native plant garden!

Foster lifelong interest in the sciences and the world around us. Experience California first-hand among amazing plants and animals in the nation's oldest native plant garden.

Our 78-acre garden is an ideal outdoor classroom to inspire lifelong environmental stewardship and engage students in exploring the wonders of nature. Topics addressed during our school programs include: structure, function, and growth requirements of plants, ecology, and adaptations.

To schedule a tour, visit SBBotanicGarden.org/visit/group-experiences or email tours@SBBotanicGarden.org

Garden Programs align with:

- Next Generation Science Standards
- CA Common Core Standards
- CA Environmental Education Initiative

School Tours

Wonders All Around Us

Students utilize their senses to investigate how plants interact with animals and their environment while slowing down to appreciate the wonders all around.

60 minutes | Grades: K-2

Habitats & Homes

With native plants as the foundation of a healthy ecosystem, we'll explore how plants are interconnected with animals and humans.

60 minutes | Grades: 3-5

Details

Tours are available for a maximum of 40 guests, including students, teachers, aids and adult chaperones.

Students: \$9 | There is no charge for teachers and aids employed by school. Each adult chaperone accompanying the school group must make a reservation and pay the Garden's current rate for admission.
