What Is Adderall?

Adderall contains a combination of **amphetamine and dextroamphetamine**, two active ingredients that stimulate the central nervous system. This enhances focus, attention span, and alertness, helping users manage ADHD or narcolepsy symptoms effectively.

Primary Uses of Adderall:

- Treatment of **Attention Deficit Hyperactivity Disorder (ADHD)**
- Management of **Narcolepsy (sleep disorder)**
- Enhancing concentration and productivity under medical supervision

Adderall works by increasing neurotransmitter activity in the brain, improving mental clarity, reducing impulsivity, and supporting sustained focus.
